

Caractéristiques :

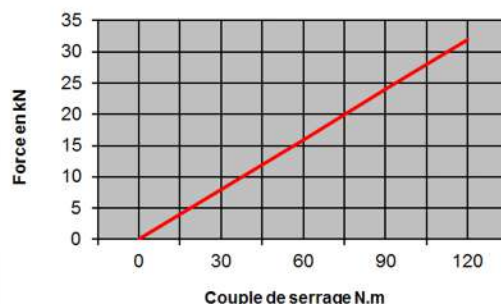

- Etau à serrage concentrique de précision possédant une largeur de mors de 125 mm et ayant une répétabilité de ± 0.01 mm. L'ouverture des mors est incrémentale et de course 80 mm maximum.
- Les mors cémentés sont réversibles pour une ouverture maximale.
- L'effort de serrage peut aller jusqu'à 32 kN.
(couple maximum 120 N.m)
- Poids : 15.3 kg

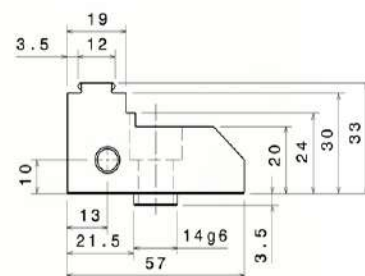

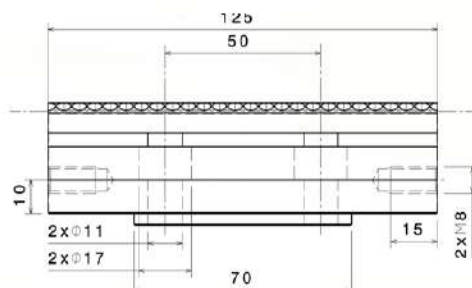

Type	Réf.	CM125-R300-I
Force de serrage	kN	32
Masse	Kg	15.3
Course	mm	80
Répétabilité	mm	± 0.01
Incrément des mors	mm	35x4

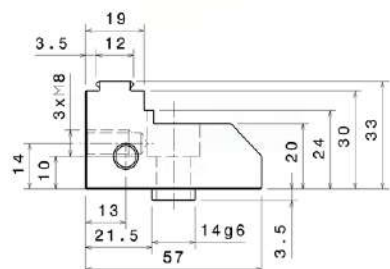

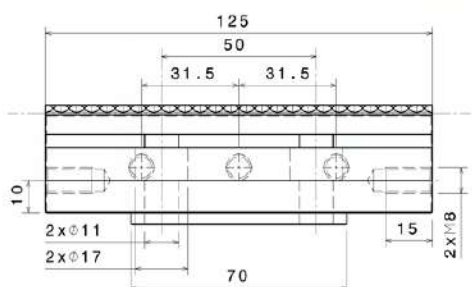

Force de serrage étau Easyclamp CM125 R300 I

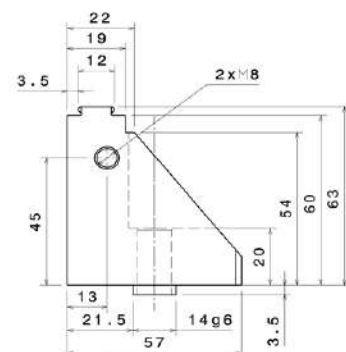

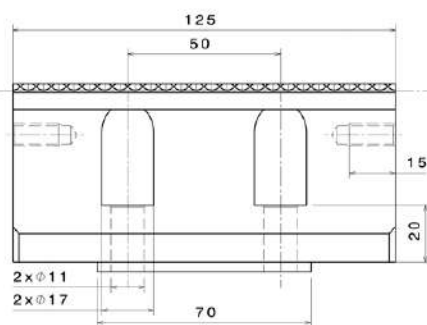

Mors MGM-CM125-RI

Mors MGM-CM125-RI-M8

Mors MGM-CM125-RI-H63

Mors ML-CM125-RI (usinable)
